

Under the **Global Electric Cooking Coalition (GeCCo)** banner, **name of organisation** is currently working in partnership with the **Ministry of Energy/ Environment of country XXXX** to assess the readiness for mass scale up of electric cooking (eCooking) with the following aims:

1. **Drive the demand/usage of electricity for cooking** – delivering both enhanced access to clean cooking and healthier power suppliers at all scales, thereby increasing their capacity to deliver access.
2. **Help bridge the gap in clean cooking access** (an objective that is grossly off track from the 2030 SDG 7.1.2 target after a mere 12% increase over the past decade, a trend that will leave a quarter of the world's people without access to clean cooking in 2030) by providing a powerful new aspirational choice for consumers of different types.
3. **Raise the level of political ambition (globally and nationally)** for accelerating the rapid adoption of eCooking solutions via clear and consistent messaging about its advantages.
4. **Support accelerated improvement in households' tiers of access** – delivering affordable access to eCooking is also important to allow those already accessing improved cookstoves to transition to stoves that provide greater health, climate, and social benefits.
5. **Support decarbonisation** of households and institutions by shifting them from biomass, with its associated contribution to deforestation and toxic emissions (CO₂ and black carbon) whilst ensuring that electric cooking is promoted alongside power sector decarbonization, thereby avoiding problematic lock-in to fossil fuel-based cooking fuels.

We are pleased to announce a call for 'the provision of Consultancy Services to support the readiness assessment for XXXX'.

Main tasks of the consultancy

The expert will work (virtually) under the substantive guidance of **name of organisation** and will be administratively reporting and accountable to **name of organisation**. Key tasks will include the following activities:

- Provide a detailed account of country **XXXX** eCooking context across designated topics
- Identify barriers to scale which may be addressed and mitigated
- Present findings in language appropriate for non-technical consumption by decision-makers and GeCCo partner organisations
- Present clear indication of next steps towards implementation

Important information

The tender exercise is managed by **xxxxxx**. Please send all responses to **xxxxxx@xxxxxx.co.uk** with the subject '**XXXX Readiness Assessment Proposal**'. All proposals must be received by **date**.
